Tools Required:
50/50 Isopropyl alcohol/water mix, razor blade, X-Acto knife, 3M 06396 or Lord Chemlok AP134 adhesive promoter, clean soft rags and automotive grade masking tape.

Notes to the Technician/Installer:
E&G is proud to present this package to you and reminds you that for technical information, contact technical assistance at 410-381-4900. Do not attempt the installation of any E&G product without first reading the detailed instructions. E&G Classics will not warrant damaged parts or the vehicle due to altered installation procedures.

1. Place the louvers onto a clean, flat work area. Temporarily install the mounting brackets (two (2) center studs at the bottom). Install the remaining six (6) mounting brackets with edge studs around the perimeter. Install the nylon thumb nuts to retain the brackets, tightening until all brackets are tight against the inside surface of the louvers.

2. Install the supplied 1/8" x 1/4" foam tape to the inside surface (where shown with white lines) breaking at the mounting brackets.

3. Remove the tape backing at this time.

4. Add a second layer of tape to the first layer of tape, between the stantions overlapping them by one inch as shown (where indicated in the first photo). Once the second layer of tape has been installed, peel off the tape backing.

5. Peel off the double faced tape from all mounting brackets.
6. Thoroughly clean the inside lip of the trunk lid where it lines up with the rear window. Install the supplied 1/8" x 3/8" single sided foam tape across the inside edge of the trunk lid (1/8" back from the edge) to prevent the louvers from hitting the trunk lid.

7. Thoroughly clean the rear window on the vehicle using a 50/50 alcohol/water mix and a razor blade where the mounting brackets will be attached. **Do not use glass cleaner!** Apply protective masking tape around the rear window to protect the paint during louver alignment (not shown).

8. Open the trunk lid and align the louvers in place making sure it is perfectly centered on the rear glass and tape them into place.

9. Loosen the thumb nuts three of four turns but do not remove them at this time.

10. Press the thumb nuts down to push the mounting bracket so the tape makes contact with the rear glass.

11. Remove the louvers and press the mounting brackets firmly against the glass to set the tape.

12. Secure the louvers using the supplied nylon thumb nuts.

13. Finished installation.
